

TOWN OF HILL
SELECTMENS MEETING
APRIL 21, 2009

Present: Mike Brady, John Lynch, Mark Dow

Discussed why the Fire Department is cutting across the grass island to access 3A. This is not acceptable and must be stopped.

Discussed the need to put additional ordinance in place to deal with the fact that Edmonds pit will be setting up a commercial resale operation which could increase the amount of truck traffic on Dearborn Rd. Will need to meet with Dave Kratz to work out the details.

Talked with Dean on job applicants. Want to meet with him about 7:30 next Tuesday to review applications and see if there are any candidates we want to interview.

Art Ellis gave us a briefing on potential project types that may become available from Federal stimulus funds. Weatherization and heating system projects may be something we can tap into. We agreed to support the Schools efforts and see if we can include the town office in any project they may propose.

Signed the agreement with PSNH on the right of way to the water tank.

Gerry Desrochers was representing the fire department and we informed him of the problem with the grass strip. Need to send Matt a memo on this.

Adjorned at 8:30
