

HILL POLICE DEPARTMENT

“METH” LAB AWARENESS MEETING

April 19, 2011 at 7:00 PM

On April 19, 2011, The Hill Police Department is hosting an informative meeting about the recent events on Currier Road. The meeting will be held at the Public Library.

As you may already know, The Hill Police in cooperation with the Drug Enforcement Administration, The NH State Police and the NH Drug Task Force arrested two people for manufacturing methamphetamine. “Meth” is an extremely addictive and dangerous drug. The manufacturing process is extremely dangerous. The waste and by-products of it manufacturing is extremely toxic and equally dangerous.

The Hill Police Department encourages residents (especially those who live in the Currier Road, Tioga Road and Bunker Hill Road areas) to attend this brief meeting and to learn about the “Meth Lab” that was in Hill and to become aware of some of the materials that may still exist in your neighborhoods from this lab.

With public awareness of the dangers of Methamphetamines, and with your assistance, the Hill Police Department hopes we can prevent future occurrences of drug labs in the Town of Hill.

For Information about the meeting call the Hill Police Department at 934-3949
